I would like to express how xm radio benefits me. When traveling from State to State not being familiar with the local channels, I can use my xm radio-which I pay for to find out travel and weather conditions when I am entering the city. I'm tired of the non variety of music that comes with the local channels. Also when we reach certain areas of our state the and neighboring States the local channels are limited and only one type of music. I respectfully urge the FCC to reject the NAB's petition 04-160 and support xm's ability to provide programming that I demand and deserve and am willing to pay for.
